

Hive Wintering Checklist

LEAVE ENOUGH HONEY

- Leave at least 20 hive body frames full of honey in your hive
- Leave the required amount even for productive hives?

COMBINE WEAK HIVES

- Merge struggling hives into one stronger colony
- Combine any late split or late re-queen colonies

PROTECT YOUR HIVE FROM WINTER DANGERS

- Move your bees out of the snow & wind
- Place your hive in a safe location away from prowling animals
- Place your hive in a low-traffic, dry location?

NOTES
